DETAILED ACTION

Applicant's amendment has overcome the previous rejections of 112/2nd, 102 and 103. However, new claims 38-41 are drawn to method of prevention which poses the issue of "scope of enablement". Thus, a new ground of rejection is addressed herein.

Claims 1, 14, 16, and 29-37 have been cancelled. Therefore, only claims 2-13, 15, 17-28, and 38-41 are pending for consideration.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Scope of Enablement: Claims 2-13, 15, 17-28, and 38-41 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the treatment of disorders related to NF- κ B and TNF- α , does not reasonably provide enablement for the prevention of such disorders. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The specification does not provide sufficient guidance for one skilled in the art to prevent disorders related to NF- κ B and TNF- α . Note, there is no disclosure on the

onset for prophylactic regimen, the type of patients and/or prognosis of disease states. Thus, given the unpredictable nature of pharmaceutical art, the skilled artisan will have to carry out undue experimentation to prevent such disorders with the compounds claimed herein.
